

A website for our Classes (tuition) service

1. Introduction

- Our project's aim is to; simply get the information about the different classes we offer in a clear and concise manner to our customers that is readable and easy to understand.
- Creating a web portal like this is the first step for any organization to create an online presence in this ever-changing world. And to stay up with the competition it is necessary for us to make sure that it is as easy as possible for our customers to know all about us.

2. Expected List of Features

- Our website should allow the customers to know the Classes better and understand what we stand for and better resonate with our core message. This is possible with a comprehensive detail of the Class's courses, infrastructure, our faculties and our other services that we offer which should be easily available in our main page for all visitors to see.
Other features will include:
 - A method to contact us with a form available at the contact page
 - The ability to learn about the admission process and submit an online application
 - An extensive catalogue to showcase our professors
 - An extensive catalogue to showcase our courses
- Features like easier access to details about the classes is just a necessity
While a form to contact us is a modern approach to improve communication
Online application is one of the most important feature for the quality of life it provides
A catalogue to showcase our professors as well as courses are important for our customers to make an informed decision

3. Market Survey

- With more research into the market, we have found some websites that are similar to our end goals (listed below):
 - <http://mctrigit.ac.in/>
 - <http://www.djsce.ac.in/>
 - <http://www.spce.ac.in/>
 - <https://www.mit.edu/>
 - <https://www.berkeley.edu/>
- Aim to make similar portals to access more details about the institutions and the services they offer
