

# Final Report

## Website for our Classes (tuition) service

### 1. Introduction

- Our project had the aim to realize a web portal for our website and create an access point for our customers to our service. The website was supposed to create ease of life and improve the customer experience of all of our clients while also representing us in the most suitable manner.

### 2. Design and Implementation

- Our web portal can better communicate the services that our Classes provides to any potential customers.  
Some of its features include:
  - A method to contact us with a form available at the contact page
  - The ability to learn about the admission process and submit an online application
  - An extensive catalogue to showcase our professors
  - An extensive catalogue to showcase our courses
- All of these above designs and features were implemented using simple bootstrap and we tried our best not to over complicate the matter.  
using simple codes and simple modes of coding we were able to achieve our goal as well as make sure that everything is up to standard
- Details of how we converted from design to the actual realization of your project in terms of implementing the code can be found in our github repository mentioned below.
- All choices that we made, and any modifications that we made to the design, in response to difficulties that you might have encountered while implementing the project were to a minimum and not worth the mention. It was all technical in expertise that we had to educate ourselves for
- A brief discussion of various modules and libraries that we used in implementing our project. Highlights are shown below in use in these screenshots:

(conclusions and reference are provided after the screenshots)

**M.R Classes Final Year Exams: Kabhi haan, kabhi na leave students confused**

4-Jun-2020 87297

It's a classic case of Kabhi Haan, Kabhi Na, when it comes to M.R Classes examinations as decision on Maharashtra Final year exams remains a moot point. University exams have quickly escalated from an academic dilemma to a political debate in the state with students waiting for a definitive answer.

**M.R Classes Exams get more supporters, teachers and principals push for exams - offer way ahead** New

**Meet our Founder**

**Dr Manojit Roy**

The M.R Class Society believes in student-empowerment through education. The strength of the nation lies in the strength of the student community. The society lays its focus on achieving unparalleled excellence by optimizing the potential of students, and working towards their holistic growth, for the welfare of the society, and humanity at large. -President M.R Classes

In the early part of the twentieth century, the architects of the Constitution of India visualized and concluded that the education system has to be a powerful instrument of social, economic and cultural transformation necessary for the realization of India's national goals. Their dream then was to develop an education system that would increase national productivity, achieve social & national integration, accelerate the process of modernization and cultivate social, moral and spiritual values.

"Education is the most powerful weapon which you can use to change the world."

— Nelson Mandela

## Our Unique Class Design

Students need to be in classrooms that inspire them—spaces that are light, airy, and filled with examples of work that they aspire to do. Each school will have a variety of spacious classroom settings. Some will be more traditional in the way that we envision classrooms now, but others might be set up outside or within an atrium or amphitheater. There might be desks, cushions, or benches arranged in rows or circles—however the teachers want them, as not every classroom will follow a template. Each classroom will be set up based on what is necessary to meet learning objectives.

Creative classrooms don't just look different, they feel different. They provide an environment where students are more likely to express their ideas, think outside the box, challenge problems with innovative ideas and solutions and most importantly—learn faster and more effectively.

[Professors](#)

**Our teaching faculty consists of highly trained professionals with more than 5 years of teaching experience**

**Physics professor**

**- D.R. Modi**

Leveraging my 14+ years of experience, I anticipate that I will be able to contribute highly to helping students meet their curriculum goals, and provide them with a wider view of perception of this form of science.

**Maths professor**

**- Mahesh Komal**

Since I have taught students ranging from ages 8 to 16, I am well aware of all levels of Maths education and can quite comfortably incorporate technology into regular lessons. I believe this skill will help students in learning through both conventional means and modern ways.

**Biology professor**

**-Neeta Sarode**

I am an enthusiastic and passionate individual who enjoys sharing knowledge with a proven record of helping children progress through positive learning experiences. I have enriching experience in training and developing the effective behaviour management system of children.

**Chemistry professor**

**-Vinod Guptapapa**

A Teacher is responsible for preparing lesson plans and educating students at all levels. Their duties include assigning homework, grading tests, and documenting progress. Teachers must be able to instruct in a variety of subjects and reach students with engaging lesson plans. And I plan to do just that!

### 3. Conclusions

- Results we obtained from our project was fascinating.
- Features of the project:
  - A web portal that can better communicate the services that our Classes provides to any potential customers.  
Some of its features include:
    - A method to contact us with a form available at the contact page
    - The ability to learn about the admission process and submit an online application
    - An extensive catalogue to showcase our professors
    - An extensive catalogue to showcase our courses
- Shortcomings of the project:
  - None, since we implemented everything, we sought out for
- We would have made no different choice since we are just doing what we want but in hindsight if we wanted to spend more time on it we may refine the animations a bit more
