A website for our Classes (tuition) service

1. Introduction

- A web portal that can better communicate the services that our Classes provides to any potential customers.
  Some of its features include:
  - A method to contact us with a form available at the contact page
  - The ability to learn about the admission process and submit an online application
  - An extensive catalogue to showcase our professors
 - An extensive catalogue to showcase our courses

2. User Interface Design and Prototype

- Contact page with a contact forum:

This is them most efficient feature to get the direct communication from our users and customers to us without another medium involved. It also improves a lot of quality of life

- Homepage with News feature

This feature becomes an outlet for us to give the latest information to the customers in a meaningful way

3. Navigation Structure

- The navigations are mainly dependent on the 4 tabs (at the top right) which also then further breaks down into sub navigation (left column) as such:
    - Home
        - Landing intro
        - News
        - Events
    - About us
        - Message from our principal
        - About Class
        - About Courses
        - About Faculties
    - Contact
        - Our Address and number
        - Direct forum

- Admission
  - For 10th
  - For 12th
  - For Engineering
  - For Masters

4. References

- "A detailed book of how to make your own class" – by Author Nanam Dal (1978)
